

February 2, 2010

Team Members:

The following job is currently available at TISA for our Team Members:

Group Leader: Coordinates the assigned area of operations while providing motivation and direction to team leaders and team members that focus on safety, quality, efficiency, and cost reduction.

Essential Duties and Responsibilities:

- 1) Leads a manufacturing system emphasizing teamwork, safety, training, and discipline
- 2) Work with the assistant manager to develop standardized work procedures by designing and/or documenting the best work sequence for each process
- 3) Utilize TPS techniques to standardize process/methods, identify waste, methodically eliminate waste, and standardize the new process/methods
- 4) Direct floor activities through consistent application of TBBP to assure all aspects of manufacturing are effective and correct sub-standards
- 5) Coordinate safety, quality, productivity, and cost improvement projects
- 6) Responsible for maintaining training matrix for team leaders and/or team members, assuring training is effective and correcting sub standard performance

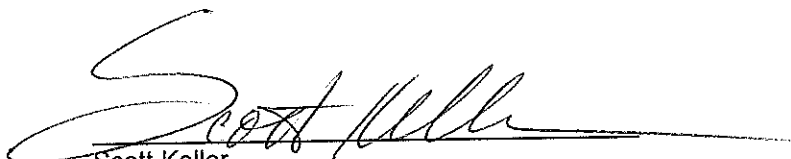

Qualifications:

- 1) Demonstrated experience using Microsoft Office products, such as, Excel, Word, and Outlook
- 2) Ability to communicate and work well with others in a group environment
- 3) Strong organization and planning skills

Education and/or Experience:

- 1) Associate degree in Management or related Manufacturing Field or equivalent 3 year plus years experience in production/manufacturing environment

If you are interested in this position, please contact Julia Sweet by 5:00 PM on February 9, 2010.
